SUMMARY

Highly skilled and motivated Frontend Developer with 1 year of experience in building interactive and user-friendly web applications using React.js. Seeking a challenging position as a Frontend Developer with a focus on React.js in a dynamic organization where I can leverage my technical expertise and passion for creating exceptional user experiences. I completed the frontend course at Najot Talim Fergana branch in 2023.We worked on more than 10 projects with the team there

----

EXPERIENCE

Findwork | Fergana
React Js Developer | 06/2023 - Present

- Developed web applications using Next js Talwind Redux Toolkit TypeScript and integrating external web services.
- Worked on a global website and e-commerce and corporate website for Orzugrand Trade Center.
- Developed a CRM system for OrzuGrand Trade Center using React Js Talwind Redux Toolkin and Pusher.
- Implemented authentication and authorization using JWT and Passport.js.
- Used Postman for API testing and documentation

NajotTalim | Fergana
React Js Developer | 03/2023 - 06/2023

- Developed web applications using HTML, CSS, JavaScript, React js, NextJs and TypeScript. This project is a real startup. You can see admin, instructor and user professional dashboards in the project. In order for the project to be at the international level, we have made it in 4 languages English, Uzbek, Turkish and Russian. To add payment methods, we used Stripe, one of the international companies. Students will be able to buy courses and also buy monthly VIP rates. Of course, instructors automatically send themselves to their cards within 24 hours of receiving their income. Of the profits, 70% for the instructor and 30% for the platform. Admin users, on the other hand, will be able to manage instructors. On the platform admin users can place paid books and users have to buy them PDF files to email addresses.
- Full stack app with subscription plan. The customer can log in and register on the app, but without a checkout plan, they cannot take full advantage of our platform. We have used every protected page. After registration, the user must buy one plan out of three. We have integrated payment with stripe. Firebase to authenticate and save some user data. The customer can also change or cancel the subscription and manage payment details.

EDUCATION

- Tashkent University of Information Technologies | Fegana, Fergana Software Engineering | 07/2023
- Learned core concepts of software engineering such as data structures, algorithms, databases, web development etc.
- Completed various projects using Java, Python , C++ etc.
- Participated in extracurricular activities such as coding competitions and hackathons.
- I completed the frontend course at Najot Talim Fergana branch.
- There I learned html, css, scss, bootstrap, javascript webpack, rest api, tailwindcss, react js technologies
